flexible storage
and cover systems

wiefferink

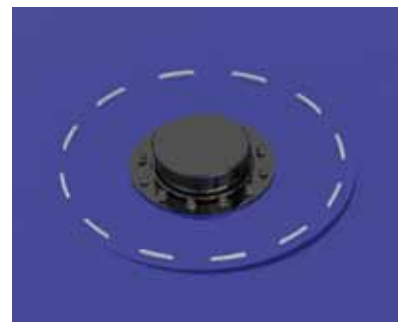

< Flexitank

Flexible liquid storage

< Safe and durable

The Flexitank is designed to store liquids: from clean water and fuels to wastewater, fire extinguishing water and liquid buffers for industrial use. It is a unique product that makes safe, durable storage of liquids possible in any location.

FILLER CAP WITH PROTECTIVE COVER

LIFTING LOOPS

Flexible liquid storage

THE WIEFFERINK FLEXITANK (ALSO KNOWN AS PILLOWBAG INTERNATIONALLY) IS SUITABLE FOR BOTH TEMPORARY AND PERMANENT STORAGE. THE ADVANTAGES OF A FLEXIBLE INSTALLATION OVER A PERMANENT STRUCTURE MAKES THE FLEXITANK IDEAL IN COUNTRIES WHERE BUILDING PERMITS OR CONSTRUCTION MATERIALS ARE DIFFICULT TO ACQUIRE.

The Wiefferink Flexitank can be filled and emptied via lead-throughs. The product is ideal for connection to a filter system. The Flexitank concept is used in such places as Somalia, Pakistan and South Africa in this way, mainly in locations where drinking water cannot be offered in a regular manner.

Clean drinking water worldwide

The Flexitank is used by Dutch and international water companies for both emergency drinking water provision and regular drinking water supply. Wiefferink Flexitanks are also used at international sporting events, such as the soccer World Cup and European Cup and London 2012. In cooperation with these companies and relief organisations, the Flexitank has been further developed and granted drinking water certification, FDA certification and UK WRAS certification. In order to supply the world's citizens with clean drinking water, a fully-fledged, safe and durable drinking water system was created. Moreover, the Flexitank is easy to install on location and can be used immediately in case of emergency.

High-grade, certified materials

The Wiefferink Flexitank is manufactured for repeated use. We use high-grade materials that are extremely strong, light and flexible. These materials are thermally and high-frequency welded with care. The production method has been recorded in ISO documentation and certified by KIWA.

Flexitank for fuels and other liquids

Because the Flexitank can be made of special chosen flexible foil that is impermeable to a certain liquid, it can be used to store diesel, for example, or kerosene, de-icing fluid, liquid chemicals, fire-extinguishing water or wastewater.

Easy to transport

The small Flexitanks are extremely easy to transport in containers, pick-ups or flatbed trailers. Empty, the product takes up just 2% of its maximum volume. The Flexitank can be set up quickly and easily and it provides optimum protection for the liquid. This efficient liquid storage can be supplied in a variety of standard volumes (5, 10, 15, 20 and 25 m³) or in a custom size, up to 1500m³, entirely according to your specifications.

Advantages

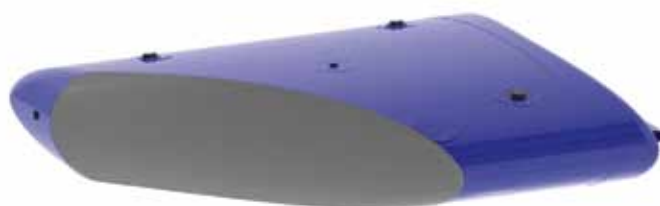

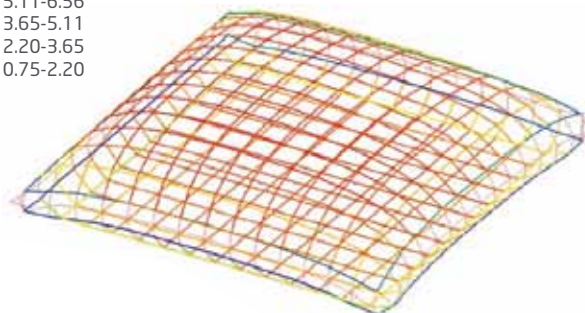

- 1 STORAGE FOR LARGE VOLUMES OF WATER
- 2 FLEXIBLE SYSTEM
- 3 EASILY APPLICABLE
- 4 AVAILABLE IN STANDARD VOLUMES AND CLIENT-SPECIFIC SIZES
- 5 AVAILABLE IN REMOTE LOCATIONS
- 6 EASY TO TRANSPORT DUE TO RELATIVELY SMALL VOLUME AND LOW WEIGHT
- 7 44% HIGHER CARRYING CAPACITY THAN VATS, WHEN TRANSPORTED IN CONTAINERS
- 8 TAKES UP JUST 2% OF THE MAXIMUM VOLUME WHEN EMPTY

For storage of:

- > RAINWATER, DRINKING WATER, FIRE-EXTINGUISHING WATER, IRRIGATION WATER AND WASTEWATER
- > EDIBLE OILS
- > FRUIT JUICES
- > WINE
- > LATEX
- > PHARMACEUTICAL LIQUIDS
- > CLEANING PRODUCTS
- > FUELS
- > DE-ICING FLUID

FLEXITANK

THE WIEFFERINK GROUP WORKS WITH FLEXIBLE FOIL AND SUPPLIES PRODUCTS AND SERVICES RELATING TO STORAGE AND COVERING SOLUTIONS. WE ARE WIDELY ACTIVE IN THE ENVIRONMENTAL AND BIOGAS BRANCHES.

The Wiefferink Group

Thanks to more than 50 years experience working with flexible foils, we have acquired unprecedented know-how of complex storage and covering issues. That is why our products, techniques and processes are so reliable.

Highest quality

We strive for top quality in everything we do. Wiefferink is a modern, industrial foil processor with KIWA, KOMO, VCA and ISO 9001:2008 certifications. We have the most advanced production methods at our disposal; modern thermal and high-frequency welding equipment, CNC cutting technology, our own laboratory, testing facilities and quality protocols ensure the high quality standard of our products. We deliver that top quality together with the unrivalled enthusiasm of our specialised employees.

Continuous development

Wiefferink applies the most modern production technologies and continuously develops its products. With the input of our clients, the newest techniques and innovations, we raise our products to an ever higher standard of quality.
